Digital Literacy Project Report(CSE0001)

Name: Vaibhav Dewangan Registration
Number: 25MIM10135
Branch: Int.Mtech AI
Year: 1st Year
Course: Digital Literacy(CSE0001)

Table of Content :

S.no	Content	Page no
1.	Introduction	2-3
2.	Infographic	3-4
3.	Digital Portfolio	5-6
4.	Platforms	7-8
5.	Email Etiquette	9
6.	Cyber Awareness	10
7.	Conclusion	11
8.	References	12

Introduction :

Thisproject wasundertaken as part of the Digital Literacy course with the objectiveof developingessential skills required to effectively navigate the digital world.
As a Student Digital Ambassador, the project focused on creating awareness about digital literacy, building a professional online presence, and understanding safe and responsible digital practices. The tasks involved designing an infographic, creating professional profiles on key platforms, exploring coding and collaboration tools, practicing email etiquette, and studying cybercrime scenarios. Through this project, I gained practical exposure to various digital tools and platforms, while also improving my understanding of online communication, data safety, and professional digital behavior. Overall, the project helped in building a strong foundation for academic and professional growth in a digital environment.

Task -01 (Info Graphic)

Forthistask, I createdadigitalliteracyawareness infographic using Canva. The infographicwasdesignedasaone-pagevisual resource toexplain the concept of digital literacy and its importance for students. It covered key topics such as safe internet practices, professional online presence, and the use of digital tools for learning. The goal was to make the content visually engaging and easy to understand for my peers.

I used simple layouts, icons, and color schemes to highlight important points clearly. One challenge I faced was selecting relevant information and presenting it concisely without overcrowding the design. However, this helped me improve my ability to communicate ideas effectively through visuals. I found the process interesting as it combined creativity with structured thinking, and it gave me a better understanding of how visual communication plays a role in digital literacy.

Task -02 (Digital Portfolio)

In this task, I created and updatedmy profiles on GitHub, LinkedIn, and Kaggle to establish a professional digital presence. GitHub was used to showcase my coding-related activities and to create a profile README highlighting my academic background and interests.LinkedIn was used to present my educational details and connect with a professional network. Kaggle was chosen to explore data science concepts and datasets.

Each platform serves a unique purpose: GitHub is useful for project development and version control, LinkedIn helps in networking and career opportunities, and Kaggle supports learning in data science and analytics. Over the next four years, I plan to actively use GitHub to build and showcase projects, LinkedIn to connect with professionals and explore internships, and Kaggle to improve my analytical and problem-solving skills. This task helped me understand the importance of maintaining a clean and professional digital identity.

Task 3 – Platforms

In thistask, I exploredbothcoding practice platforms and collaboration tools. For coding practice, I used HackerRankand completeda beginner-level problem. This helped me understand how coding platforms work and how they can be used to improve problem-solving skills.These platforms provide structured challenges that are useful for building programming logic and preparing for technical interviews

These platforms are highly useful in an academic context. Coding platforms help in strengthening programming skills, while tools like Google Forms support surveys, quizzes, and collaborative work. This task improved my familiarity with online tools that are essential for both learning and collaboration.

For collaboration, I created a Google Form titled “Digital Literacy Awareness Quiz” consisting of five questions, including multiple-choice and short-answer types. I also linked the form to a Google Sheet to collect responses. This activity helped me understand how digital tools can be used for data collection and analysis.

Task 4 – Email Etiquette

Inthistask, I practiced writing professional emails and learned the importance ofproper communicationin a digital environment. I drafted two emails: one requesting an assignment extension from a professor and another expressing interest in a summer internship opportunity. Both emails followed a formal structure with clear subject lines, polite language, and proper formatting.

A common issue in digital communication is the use of informal language or unclear messaging, which can create misunderstandings. For example, a poorly written email without a clear subject or proper tone may be ignored or misinterpreted. This task helped me understand how to communicate clearly and professionally, which is essential in academic and professional settings.

Task 5 – Cybercrime Awareness

In thistask, I studied UPI-based paymentfraud, which isa common cybercrime in India. I learnedhowfraudsters trick usersinto approving payments by sending fake requests or links. One surprising aspect was how easily users can be misled into sharing sensitive information due to lack of awareness.
This task made me more cautious about online transactions and digital security. One habit I will adopt is to always verify payment requests and never share my UPI PIN with anyone. Understanding cyber threats and prevention methods is essential for safe digital usage, and this task helped reinforce responsible online behavior.

Conclusion

This projectprovidedacomprehensive understanding of digital literacy and its practical applications. Through various tasks, I developed skills in visual communication, professional profile building, coding practice, digital collaboration, and online safety. The project emphasized the importance of maintaining a responsible digital presence and communicating effectively in professional environments. It also highlighted the risks associated with cybercrime and the need for awareness and preventive measures. Overall, this project has enhanced my confidence in using digital tools and prepared me for future academic and professional challenges.
